Humidity/Temperature Transmitters

The Series 657 Relative Humidity/Temperature Transmitters provide two 4-20 mA channels to produce separate output signals for both relative humidity and temperature. These devices deliver $\pm 2\%$ accuracy for humidity and $\pm 1^\circ\text{F}$ for temperature measurements. Stainless steel probe can be easily mounted to most ductwork using either of the two optional kits below.

BENEFITS/FEATURES

- Polymer film humidity and thin film RTD temperature sensors offer highly reliable and stable measurements.
- Remote mount housing offers installation flexibility (657-1)
- Rugged die-cast aluminum housing is great for industrial applications (657C-1)

APPLICATIONS

- Cleanroom monitoring
- HVAC/building control monitoring
