Product Description

- **Easy to use**
  With the CL514-PLUS you can check & calibrate all your RTD instruments and measure RTD Sensors. Automatic indication of connections on the display for simple hookups.

- **Take it into the shop, plant or field**
  Carry it without worry - it comes protected with a rubber boot and rugged, low profile switch. Easy to operate even in the dark areas of the plant with the backlit display.

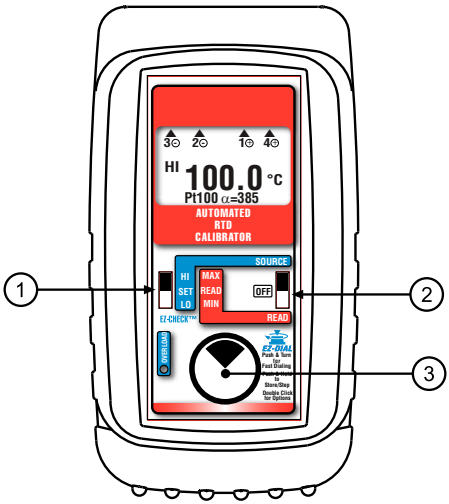
- **Calibrate directly in temperature (°C & °F)**
  Stop carrying around a decade box and RTD resistance tables. The CL514-PLUS works with the RTDs you use including Platinum 100 (alpha = 3850, 3902, 3926) & 1000 (alpha = 3850, 3750) Ohm, Copper 10 & 50 Ohm, and Nickel 120 Ohm. Easily set any value quickly to within 0.1° with the adjustable digital potentiometer "**DIAL**" plus store any three temperatures for instant recall with the HI/SET/LO™ switch.

- **Calibrate quickly with automatic output stepping**
  Choose between 2, 3, 5, 11 and 21 steps to automatically increment the output in 100%, 50%, 25%, 10% or 5% of span. Select the step time to match your system from 5, 6, 7, 8, 9, 10, 15, 20, 25, 30 and 60 seconds.

- **Compatible with all process instruments**
  Connect directly to the RTD inputs of smart transmitters, PLCs, DCS and multichannel recorders and verify their outputs or displays. Works with older instruments with fixed excitation currents and newer multichannel instruments that switch the excitation current between input channels.

- **Measure RTD Sensors**
  Troubleshoot sensor connections and find broken wires with patented technology. Connect your two, three or four wire RTDs and the CL514-PLUS automatically detects the connections and measures the RTD in degrees C or F.

Basic Operation



① **HI/SET/LO™ SWITCH**

SOURCE: Instantly output two preset RTD temperatures by moving the HI/SET/LO switch to the **"LO"** position or **"HI"** position. For fast three point checks select the **"DIAL"** position. The CL514-PLUS will remember the last **"DIAL"** value, even with the power off.
These values can easily be changed to suit the calibration requirements. The temperatures stored in the HI and LO positions are also used for Auto Stepping.

READ: Slide the switch to the DIAL position. The CL514-PLUS will display the current temperature from the RTD sensor. Slide the switch to HI and the highest temperature measured since turn-on or reset will be displayed; slide the switch to LO and the lowest temperature measured since turn-on or reset will be displayed.

② **SOURCE/OFF/READ Switch**
Select "**SOURCE**" to output in °C, °F or ohms.
Select "**READ**" to read an RTD sensor or ohms.

③ **KNOB**
SOURCE: Turn the knob to adjust the output level. Turn clockwise to increase the output, counter clockwise to decrease the output in 0.1° steps at a time. Push down and turn the knob for faster dialing.
Press and hold the knob for two seconds to store desired HI/SET/LO™ HI/LO points in SOURCE mode. *Continue to press and hold the knob for two more seconds to start the automatic stepping.*

READ: Press and hold to transfer the current temperature into the HI/SET/LO™ HI/LO points. This clears the HI/LO temperature readings which will update as the temperature changes.

Double click the knob to get into the CL514-PLUS menu. Use the menu to select RTD or Ohms, °C or °F, 400Ω or 2000Ω, RTD Type, Backlight On/Off, Step Size, Step Time and Auto Off On/Off.

CHANGING BATTERIES
Low battery is indicated by a battery symbol on the display. Approximately one to four hours of typical operation remain before the CL514-PLUS will automatically turn off. To change the batteries; remove the rubber boot, remove the battery door from the back of the unit by sliding the door downward. This allows access to the battery compartment. Replace with four (4) "AA" 1.5V batteries being careful to check the polarity. Replace the battery door and replace the boot. All stored configuration options (RTD Type, HI/SET/LO Memories, etc., are reset to factory settings when the batteries are removed.

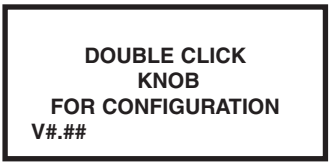
Note: Alkaline batteries are supplied and recommended for maximum battery life and performance.

Configuration

Power on & MAIN manu

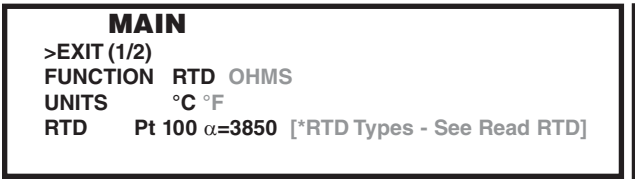
Move ② POWER SWITCH to **"SOURCE"** or **"READ"**.

Setup

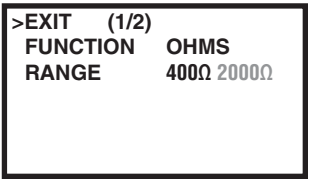


Double click the ③ DIAL KNOB at any time the unit is on and the following displays will appear for 15 seconds:

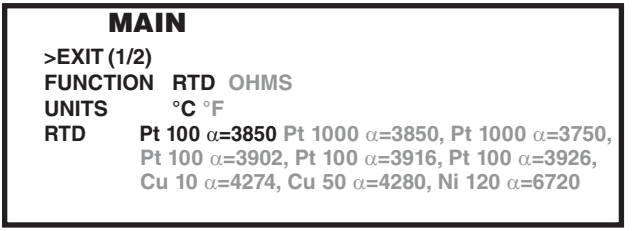
Source RTD



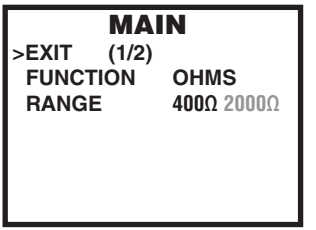
Source Ohms



Read RTD



Read Ohms



Turn the ③ DIAL KNOB to move through the menu. Press the ③ DIAL KNOB to toggle between OFF and ON or to scroll through the settings.

EXIT MENU - exits this menu immediately and saves any changes. Menu will automatically exit after 15 seconds of inactivity (countdown timer is displayed).

FUNCTION - pressing the knob will toggle between RTD and OHMS.

UNITS/RANGE - pressing the knob will toggle between °C and °F for RTD or 400Ω and 2000Ω for OHMS.

RTD - pressing the knob will cycle through the various RTD (Pt, Cu & Ni) at different base resistances and alpha values.

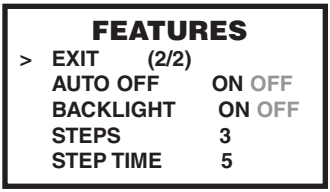
DISPLAY OHMS - If DISPLAY OHMS is ON the resistance associated with the RTD temperature will appear in small digits on the display.

Note: All settings are remembered even with the power off. Removing the batteries resets the values to factory defaults.

FEATURES - Auto Off, Backlight & Automatic Stepping

EXIT MENU - exits this menu immediately and saves any changes. Menu will automatically exit after 30 seconds of inactivity.

AUTO OFF - If AUTO OFF is ON, the unit will turn off after 30 minutes of inactivity to save battery life. If AUTO OFF is OFF the unit will stay on until the POWER SWITCH is moved to the off position.



BACKLIGHT - If BACKLIGHT is ON the backlight will light all the time the unit is powered up. For maximum battery life turn the backlight off when using the calibrator in areas with enough ambient light to read the display.

STEPS - pressing the knob will cycle through 2, 3, 5, 11 and 21 steps then reverse direction. The endpoints of the steps are based on the values stored in the **HI** and **LO** HI/SET/LO outputs.

2 steps will automatically switch between the values stored in the HI & LO HI/SET/LO (0 & 100%).

3 steps between the HI, Midpoint and LO HI/SET/LO (0, 50 & 100%).

5 steps between the HI and LO HI/SET/LO in 25% increments (0, 25, 50, 75 & 100%).

11 steps between the HI and LO HI/SET/LO in 10% increments (0, 10, 20...80, 90 &100%).

21 steps between the HI and LO HI/SET/LO in 5% increments (0, 5, 10... 90, 95 & 100%).

Note: All settings are remembered even with the power off. Removing the batteries resets the values to factory defaults.

STEP TIME - pressing the knob will cycle through 5, 6, 7, 8, 9, 10, 15, 20, 25, 30 and 60 seconds.

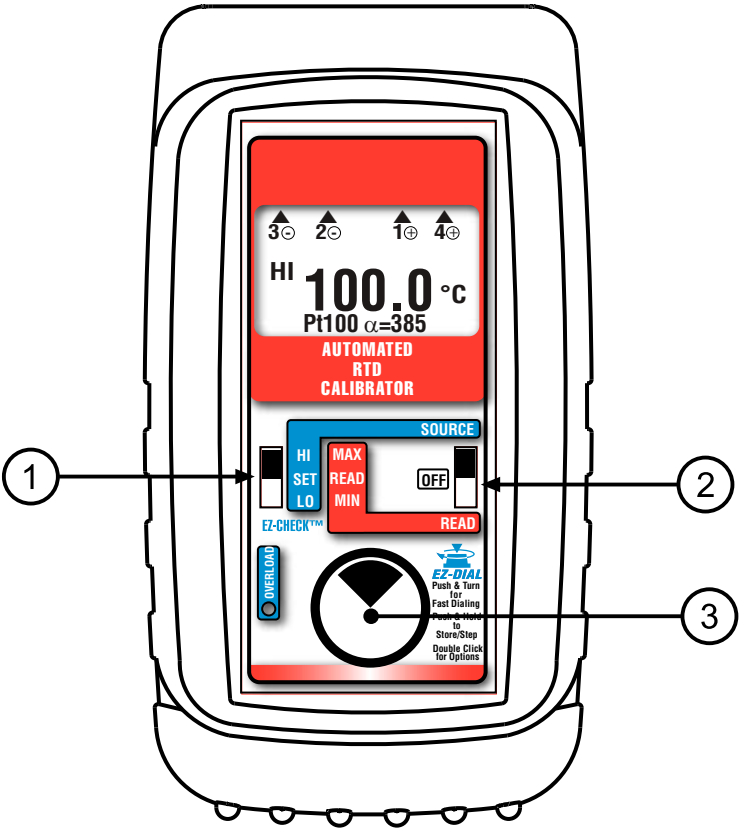
To start the Automatic Stepping
Start automatic stepping by placing the HI/SET/LO Switch into the HI or LO position then press and hold the ③ DIAL KNOB for 6 seconds (the word STORE will appear on the display after 3 seconds and continue to press the DIAL KNOB) until the word STEPPING appears on the display. The word STEPPING will appear on the display anytime the selected automatic function is running. Stop the stepping by again pressing and holding the ③ DIAL KNOB for 3 seconds.

Storing HI/SET/LO Outputs

STORING HI and LO Outputs

Choose this function to select commonly used temperature output values, and set high and low values for stepping.

1) Store your high (SPAN) output temperature by moving the HI/SET/LO switch to the **HI** position and turn the ③ knob until the desired temperature is on the display. Press and hold the knob until **STORED** appears to store the value. Release the knob.
2) Store your low (ZERO) output temperature by moving the HI/SET/LO switch to the **LO** position and turn the ③ knob until the desired temperature is on the display. Press and hold the knob until **STORED** appears to store the value. Release the knob.
3) Instantly output your SPAN and ZERO temperature outputs by moving the HI/SET/LO switch between HI and LO. You may also select any third temperature output (such as mid-range) using the SET position on the HI/SET/LO switch.



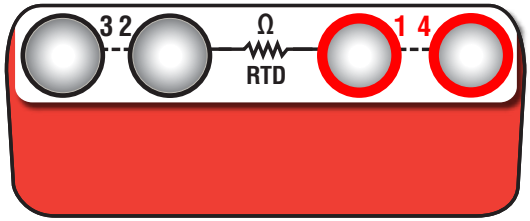
Connections

Connecting 2, 3 or 4 Wire instruments or sensors

The CL514-PLUS has four standard banana jacks for 2, 3 or 4 wire instruments or sensors. All connections are made at the top of the calibrator where the jacks are numbered for ease of use.

SOURCE
Plug in the 2, 3 or 4 wires to match the connection on the instrument being calibrated.

READ
Plug in the 2, 3 or 4 wires from the sensor and the CL514-PLUS will automatically detect the correct setting for 2, 3 or 4 wire simulation using a patented circuit.



Calibrating RTD Instruments

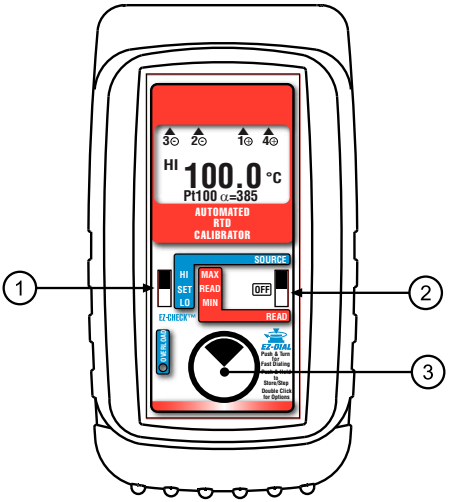
SOURCE

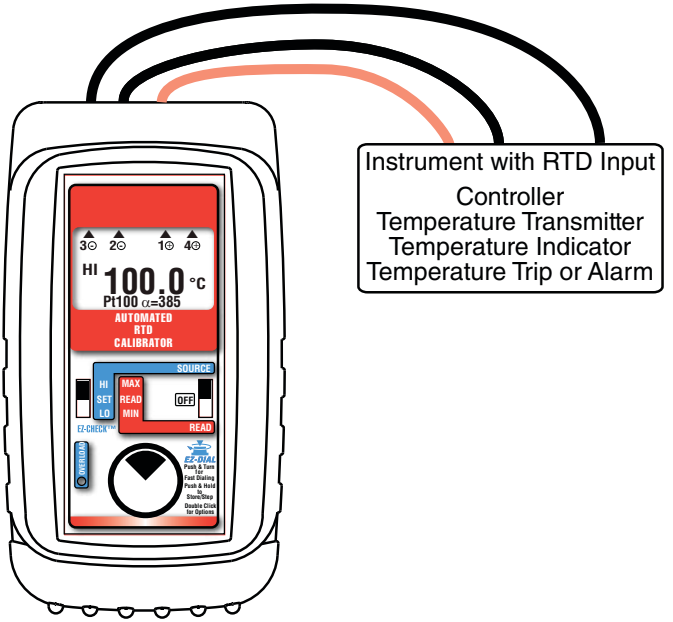
Choose this function to provide a simulated RTD signal into controllers, temperature transmitters, indicators or any input devices that measure RTD sensors.

1) Disconnect the RTD sensor from the device to be calibrated.
2) Select "**SOURCE**" with slide switch ②.
3) Connect the CL514-PLUS to the device using 2, 3 or 4 wires matching the connections of the sensor that was just removed.

The output is adjusted in 0.1° (or 0.01/0.1 ohm) increments by turning the knob ③ while the HI/SET/LO™ switch ① is in the "HI", "LO" or "SET" position. Press and turn the knob for faster dialing with 10° (or 1.00/10.0 ohm) increments.

The OVERLOAD indicator will light if excessive voltage or current is detected by the calibrator.





Reading RTD Sensors

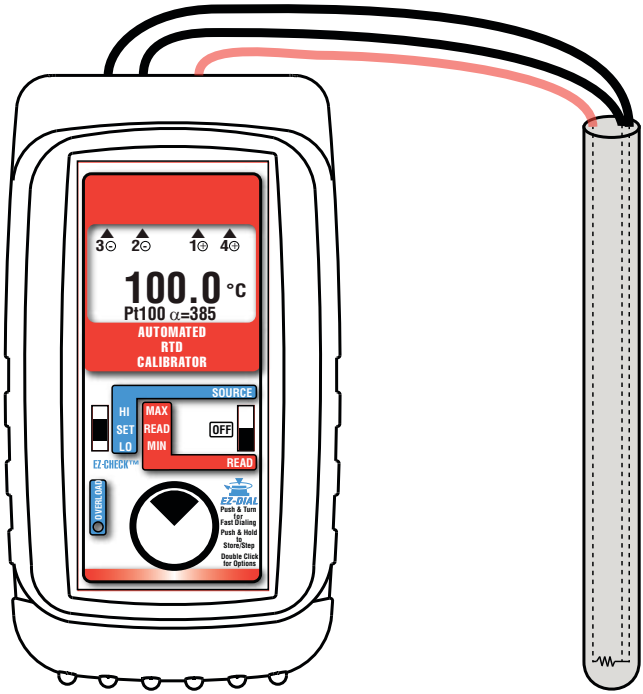
READ

Choose this function to measure temperatures with an RTD probe or sensor.

1) Disconnect the RTD sensor from any other device.
2) Select "**READ**" with slide switch ②.
3) Place the HI/SET/LO switch into the READ position.
4) Connect the CL514-PLUS to the device using 2, 3 or 4 wires.

The CL514-PLUS measures the temperature signal and constantly updates the display with the current temperature reading. Move the HI/SET/LO switch to MAX to see the highest temperature reading and to MIN to see the lowest temperature reading. Press and hold the knob ③ to clear the MAX and MIN readings.

The OVERLOAD indicator will light if excessive voltage or current is detected by the calibrator.



Troubleshooting RTD Sensors

Troubleshooting RTD Sensors

When troubleshooting a problem with an RTD input it is useful to check that the sensor and the wiring to the instrument is operating properly.

The PIE CL514-PLUS automatically detects 2, 3 and 4 wire RTD connections with a patented circuit. It will also display the connections on the display and indicate when there is a missing connection due to a loose connector, corrosion or a broken wire.

Here is an example of the CL514-PLUS reading a sensor with all 4 wire connected.

Here is an example where connections are made to a 4 wire sensor and the CL514-PLUS indicates that only Wires 1, 2 & 4 are connected. There may be a loose connection or a break in wire 3 somewhere between the sensor and the CL514-PLUS.

This is much simpler and quicker than going through the process of testing each pair of wires to figure out which, if any, connection is loose or which wire is broken.

Ranges & Accuracies

Table based on 3 & 4 Wire RTD (ITS-90) Accuracy*:
≤ ± (0.025 % of Reading +0.05 Ohms)

RTD Type	Alpha	Degrees C Range	Accuracy °C	Degrees F Range	Accuracy °F
Pt 100 Ohm (DIN/IEC/JIS 1989) Based on ITS-90	1.3850 (0.00385)	-200.0 to 160.0 1600 to 450.0 450.0 to 710.0 710.0 to 850.0	±0.2° ±0.3° ±0.4° ±0.5°	-328.0 to 320.0 320.0 to 842.0 842.0 to 1310.0 1310.0 to 1562.0	±0.4° ±0.6° ±0.8° ±0.9°
Pt 100 Ohm (Burns)	1.3902 (0.003902)	-195.6 to 170.0 170.0 to 460.0 460.0 to 648.9	±0.2° ±0.3° ±0.4°	-320.1 to 338.0 338.0 to 860.0 860.0 to 1200.0	±0.4° ±0.6° ±0.8°
Pt 100 Ohm (Old JIS 1981)	1.3916 (0.003916)	-200.0 to 170.0 170.0 to 460.0 460.0 to 648.9	±0.2° ±0.3° ±0.4°	-328.0 to 338.0 338.0 to 860.0 860.0 to 1200.0	±0.4° ±0.6° ±0.8°
Pt 100 Ohm (US Lab)	1.3926 (0.003926)	-200.0 to 170.0 170.0 to 460.0 460.0 to 720.0 720.0 to 850.0	±0.2° ±0.3° ±0.4° ±0.5°	-328.0 to 338.0 338.0 to 860.0 866.0 to 1328.0 1328.0 to 1562.0	±0.4° ±0.6° ±0.8° ±0.9°

Ni 120 Ohm (Pure)	1.6720 (0.00672)	-80.0 to 260.0	±0.1°	-112.0 to 500.0	±0.2°

*Read based on 1.0 mA of fixed excitation current

CL514-PLUS Specifications

(Unless otherwise indicated all specifications are rated from a nominal 23 °C, 70 % RH for 1 year from calibration)

General	
Accuracy	±(0.025% of Reading + 0.05 Ohms)
Temperature Drift	± 0.01% of span outside of 23°C ±10 °C (73°C ±18 °F)
Operating Temperature Range	-25 to 60 °C (-10 to 140 °F)
Relative Humidity Range	10 % ≤RH ≤90 % (0 to 35 °C), Non-condensing
	10 % ≤RH≤ 70 % (35 to 60 °C), Non-condensing
Size	5.63 x 3.00 x 1.60 inches, 143 x 76 x 41 mm (L x W x H)
Weight	12.1 ounces, 0.34 kg (including boot & batteries)
Batteries	Four "AA" Alkaline 1.5V (LR6)
Battery Life	50 Hours
Optional NiMh Rechargeable battery kit	120 VAC for North America Only; charger, four NiMh batteries, AC & DC cords [Part # 020-0103]
Low Battery	Low battery indication with nominal 1 hour of operation left
Protection against misconnection	Over-voltage protection to 60 V dc (rated for 30 seconds)
Display	High contrast graphic liquid crystal display. LED backlighting for use in low lit areas.

Read	
Excitation Current	0.9 mA to 401 Ohms, 0.4 mA to 2010 Ohms (nominal)
Normal Mode Rejection	50/60 Hz, 50 dB
Common Mode Rejection	50/60 Hz, 120 dB

Source	
3 Wire & 4 Wire Accuracy	
From 1 to 10.2 mA External Excitation Current	±(0.025% of Reading + 0.05 Ohms)
Below 1 mA of External Excitation Current	$\pm(0.025\%\ \text{of Reading} + \frac{0.025\ \text{mV}}{\text{mA Excitation Current}} + 0.05\ \text{Ohms})$
2 Wire Accuracy	Add 0.1 Ohms to 3 Wire & 4 Wire Accuracy
Resistance Ranges	0.00 to 401.00, 0.0 to 2010.0 Ohms
Allowable Excitation Current Range	400 Ohm Range:10.2 mA max; steady or pulsed/intermittent 2000 Ohms Range: 1 mA max; steady or pulsed/intermittent
Pulsed Excitation Current Compatibility	DC to 0.01 second pulse width

Additional Information

This product is calibrated on equipment traceable to NIST and includes a Certificate of Calibration. Test Data is available for an additional charge.

Omega recommends a calibration interval of one year. Contact Omega for recalibration and repair services.

Accessories

Included:

Red Rubber Boot, Four “AA” Alkaline batteries, Certificate of Calibration
Hands Free Carrying Case
Omega RTD Wire Kit
2 Red & 2 Black Leads with Banana Plugs & Spade Lugs

WARRANTY/DISCLAIMER

OMEGA ENGINEERING, INC. warrants this unit to be free of defects in materials and workmanship for a period of **37 months** from date of purchase. OMEGA's WARRANTY adds an additional one (1) month grace period to the normal **three (3) year product warranty** to cover handling and shipping time. This ensures that OMEGA's customers receive maximum coverage on each product.

If the unit malfunctions, it must be returned to the factory for evaluation. OMEGA's Customer Service Department will issue an Authorized Return (AR) number immediately upon phone or written request. Upon examination by OMEGA, if the unit is found to be defective, it will be repaired or replaced at no charge. OMEGA's WARRANTY does not apply to defects resulting from any action of the purchaser, including but not limited to mishandling, improper interfacing, operation outside of design limits, improper repair, or unauthorized modification. This WARRANTY is VOID if the unit shows evidence of having been tampered with or shows evidence of having been damaged as a result of excessive corrosion; or current, heat, moisture or vibration; improper specification; misapplication; misuse or other operating conditions outside of OMEGA's control. Components in which wear is not warranted, include but are not limited to contact points, fuses, and triacs.

OMEGA is pleased to offer suggestions on the use of its various products. However, OMEGA neither assumes responsibility for any omissions or errors nor assumes liability for any damages that result from the use of its products in accordance with information provided by OMEGA, either verbal or written. OMEGA warrants only that the parts manufactured by the company will be as specified and free of defects. OMEGA MAKES NO OTHER WARRANTIES OR REPRESENTATIONS OF ANY KIND WHATSOEVER, EXPRESSED OR IMPLIED, EXCEPT THAT OF TITLE, AND ALL IMPLIED WARRANTIES INCLUDING ANY WARRANTY OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE HEREBY DISCLAIMED. LIMITATION OF LIABILITY: The remedies of purchaser set forth herein are exclusive, and the total liability of OMEGA with respect to this order, whether based on contract, warranty, negligence, indemnification, strict liability or otherwise, shall not exceed the purchase price of the component upon which liability is based. In no event shall OMEGA be liable for consequential, incidental or special damages.

CONDITIONS: Equipment sold by OMEGA is not intended to be used, nor shall it be used: (1) as a "Basic Component" under 10 CFR 21 (NRC), used in or with any nuclear installation or activity; or (2) in medical applications or used on humans. Should any Product(s) be used in or with any nuclear installation or activity, medical application, used on humans, or misused in any way, OMEGA assumes no responsibility as set forth in our basic WARRANTY/DISCLAIMER language, and, additionally, purchaser will indemnify OMEGA and hold OMEGA harmless from any liability or damage whatsoever arising out of the use of the Product(s) in such a manner.

RETURN REQUESTS/INQUIRIES

Direct all warranty and repair requests/inquiries to the OMEGA Customer Service Department. BEFORE RETURNING ANY PRODUCT(S) TO OMEGA, PURCHASER MUST OBTAIN AN AUTHORIZED RETURN (AR) NUMBER FROM OMEGA'S CUSTOMER SERVICE DEPARTMENT (IN ORDER TO AVOID PROCESSING DELAYS). The assigned AR number should then be marked on the outside of the return package and on any correspondence.

The purchaser is responsible for shipping charges, freight, insurance and proper packaging to prevent breakage in transit.

FOR **WARRANTY** RETURNS, please have the following information available BEFORE contacting OMEGA:

1. Purchase Order number under which the product was PURCHASED,
2. Model and serial number of the product under warranty, and
3. Repair instructions and/or specific problems relative to the product.

FOR **NON-WARRANTY** REPAIRS, consult OMEGA for current repair charges. Have the following information available BEFORE contacting OMEGA:

1. Purchase Order number to cover the COST of the repair,
2. Model and serial number of theproduct, and
3. Repair instructions and/or specific problems relative to the product.

OMEGA's policy is to make running changes, not model changes, whenever an improvement is possible. This affords our customers the latest in technology and engineering.

OMEGA is a registered trademark of OMEGA ENGINEERING, INC.
