Designed for applications in hazardous atmospheres. PSW-400 Series pressure switches offer complete reliability thanks to a rugged, die-cast aluminum enclosure with waterproof gaskets and 2 separate chambers for electronics and actuator. Single or dual setpoints are available, with all critical parts made of stainless steel. In addition, the PSW-400 Series employs vibration-resistant setpoints and a calibrated scale.

Definition of Division 1:

Locations where hazardous material concentrations exist continuously, intermittently, or periodically under normal operating conditions.
